

A Study of Nosodes & Sarcodes in Homoeopathy

Dr Mansoor Ali

“Whether derived from purest gold or purest filth,our gratitude for their excellent service ,forbid us to inquire or care”

The term is due to Hering

Derived from the Greek word NOSO – which signifies the prefix added to the word to form an idea of disease or indicating a relation to the disease
Compared to Latin word NOXA _ means damage

Alledy defines as “ the nosode is characterized by a pathological substance used as medicines prepared in advance and according to Homoeopathic methods of dilution”.

Fortier Bernoville : Specificity & immunity”

Definition “ The nosodes are some Homoeopathic preparations obtained from microbe cultures, from viruses, fungi, pathological secretions and excretions.

Sarcodes are medicines prepared from healthy animal tissues and secretions.

The nosodes are prepared in two ways, according to as they come from culture of microbes – simple nosode & complex nosodes.

The nosodes should satisfy some trials strictly, the first centesimal dilution and a fortiori, the following dilution cultured on different bacteriological grounds should not give birth to any culture.

A NOSODE CAN BE USED FOR.....

1.Chronicity form

Resistance – to improvement by apparently similar remedies

Response – Poor response to a remedy

Rallying – the patient does not rally around

Recuperation – Recuperation powers are weak

Repair – repairing process stalls

2.Sequela of infection

When there is progressive debility or vague, symptoms and uneasiness with no apparent cause, continues after a past illness – patient says never well since...

3. When best selected remedy fails to act

4. When there is paucity of symptoms

According to Dr. Fellger

“ It was absurd to claim that every disease could be cleared by its nosode,for after potentiising the nosode ,we cannot be satisfied that it is in the same condition as when first taken from the diseased individual. Thus the syphilitic poison is composed of molecules, the molecules of atom. When the poison is potentiised ,the essential character of molecule is undoubtedly lost, hence it is not the same substance any more.”

TERMS RELATED TO NOSODES

Albinism _ Albin (albino) Graecum album.white excrement of dogs constipated of being ill of intestine.

Alveolinum – Pus of dental alveola

Balanorrhinum – mucilaginous fluid in gonorrhoea separated from the glands of the glans penis.

Boviluinum – Mucus fluid that flows from nose & throat of buffaloes during pest.

Brossuluinum : Syphyllinum brossuluinum- pus of venerian ulcer

Bupudopurinum – Mucus secretions of the mouth of the buffaloes who are ill of epizootic claudication (scorbatic disease of the mouth)

Carcinominum – Secretions taken out of the cancer of the armpit
 Cariosinum – Purulent matter of the bone carries
 Ceruminum – Cerumen
 Cholelithinum – Biliary calculi
 Coenurinum ovium – Cerebral hydatid
 Condulominum – Total condyloma
 Coryzinum – Catarrhal mucosity
 Coyinum equarum – Mucus of the lachrymal fistula
 Dysentrinum – Anal secretions of dysenteric mucus
 Emphyeminum – Pus of pulmonary vomit
 Entero purinum – Entero helcosinum- ichorus pus of stools
 Epihysterinum – fibroid uterus
 Enterosyringum – Fistulae of ` Boyau_ culier´
 Gonorrhinum - Spermatic liquid
 Helinum – Foot corn
 Herculinum – Foam from the mouth during epilepsy
 Herpinum – Dry & humid pustules of herpes
 Hipposterinum – Larva of oxy fly found in the great quantity in the stomach of horses in the form of bunches
 Hipposudorinum humidum – Sweat of horses
 Hipposudorinum siccum – Dust adhered to the sweat of horses
 Hippozaenium – Pus or mucus secreted through the nostrils of horses suffering from humid morve.
 Humaninum – human stool
 Hydrophobinum – Saliva of rabid dog
 Karkininum – The karkininum is discharged from glans penis, lips, nose, and uterus - the ichorus pus taken from those cancers
 Kynoluinum – Yellow mucus secreted through the nostrils & the eyes in the disease of dogs which is called craniopaste
 Kynotacninum – Taenia of dogs
 Kynotorrhinum – Pus from the ear of dogs
 Lachryminum – tears
 Leucorrhinum – White (white flour)
 Lipittudinum – Pituitous fluid coming out of the eyes of men in ophthalmia
 Lumbriciuinum – Ascarides lumbricoides
 Mastro carcinominum – Pus of breast cancer
 Medorrhinum – Mucus secreted from urethra in gonorrhoea
 Meletinum – Black matters in bloody vomiting
 Nectryaninum – Wood cancer
 Nephropostemnium – Pus of kidney abscess
 Nephrolithinum – Kidney stone
 Meletagrinum – Eczema capitis
 Odontosyringinum – Purulent matter secreted from the fistulae of teeth
 Ottorrhoninum hominum – Purulent fluid that flows out of the ears of Men
 Ozaenum – Humors of ozaena related to carries
 Parotidipurinum – Humors of parotid secretion after an Angin an inflammation of the parotid
 Pneumo lithinum – Lung stone
 Pneumopthisinum – Pus of purulent phthisis
 Podocloavinum – Corns of the sole
 Prospopurinum – Purulent matter of the coetaneous pustules of the face
 Pyonium bubonum, - Humors of bubo
 Pyonium oculorum – Purulent matter secreted from eyes
 Sudorinum pthisicum – Liquefied sweat of phthisis patient
 Sycisinum – venerian wart of men
 Sudorum pedum – Foot sweat
 Ureninum – Sediment of urine of patients suffering from intermittent fever
 Varilolinum – Purulent matter of the lymph of pustules of variola of vaccinated men

LIST OF NOSODES AVAILABLE IN THE MARKET TODAY

A. Nelson & company. 73 Duke street .London & Staufes pharma. Germany

NOSODES

Ambergriesea (?)	B. Typhimuricum
Anthracinum	B. welchi

Anti colibacillary	Bilharzhia
Aviare	Brocellinum
Actinomyces	
Adeniodum	Coli bacillary
Adenoma prostate non malignant	Calculus renalis
Arteriosclerosis	Cancer serum koch
Bacillinum	Carcinoma bowel
BCG	Carcinoma rectum
Botulinum	Ca adno(colon,stm.blder)
Bowel nosodes	Ca adnopapilaary(ovary,uterus)
Bacillus abortuns	Ca,schirrus(Stm,lung)
Brucella melitensis	Cataract (Immature/mature)
Bacillinum testicullatum	Cattle ringworm
Bacillus coli	Cholera
Bacillus dispur	Cholebacillinum
B.freidlander	Coryn.anaerobicus
B.Pyocynaceous(Pseudomona areuginosa) Coxakie	
B.tatani	
Denys	Leucoencephalitis
Diptherinum	Leptospirosis caniculae
Dpitherotoxicum	Listeriosis
Dipthericum	
DT .TAB	
Distemperinum(Canine)	Mycosis fungoidosis
Dysmenorrhoea(Polyvalent)	Melitotaxinum(malta fever)
	Micrococinum
	Mongol nosode
Enterococinum	Mucobacter mersch
Eberthinum	Myxomatosis
Empyema	Malandrinum
Epithelia syphilitica	Malaria
Epivax	Mallien/hippozenium
Erisepelas	Marmoreck
	Medorrhinum
Flavus Melitine	
Framboisinum	Melitagrinum
Fish pyrogenicum	Meningioo coccinum
Fleck fever	Monilia albicans
Fox lung	Morbilinum
Fowl pox lung	Mucor mucedo
	Muco toxin
Gonotoxinum	
Gelbfieber(yellow fever)	Ocillo coccinum
Glanders	Osteoarthritic nosode
	Ouralianum
Hafkine	Ozenine
Hydrophobinum	Oncolico noosed
Hemolytic streptococci	
Hard pad (eye/nose)	
Hepatic leusinum	Parotidinum
Herpeszoster	Pertussis vaccine
Influenza virus	Pertusin
Influenzinum virus	Pneumococcin
Influenzin vesiculosis	Pneumonia virus
	Polio vaccine
	Poliomyelitis oral vaccine
Leprum	Polypus nasalis
Leptospirae	Paratyphoidinum A&B

Leusinum/syphillinum Psorinum
Lac can (dog) Pyrogenum
Lac felinum (cat)
Lambelia intestinalis

Quadruple nosode (bacillinum,Influenzinum,Pneumo,Strepto)

Rubiola	TAB (typhoid A&B)
Rachileusinum	Tonsilinum
Rheum A nosode	Trichomonas vaginalis
Rous sarcoma	Tub.aviare
	Tub bovinum(Kent)
	Tub pisces
	Tub klebs
Schrrinum	Tub denys
Serum anti leptospirae	Tub koch
Small pox vaccine(Vaccinum)	Tub roseri
Small pox pustule (Variolinum)	Tub spengler
Syphillinum	Tub testiculatum
Serum of yersin	Tub marmoreck
Spengler	Thermibacterium fifidis
Staphylococcinum	Tauleremine
Staphylotoxinum	Typhoidinum

Streptococcinum
Streptoenterococcinum
Septiceminum

Vincent's angina
Virus pneumonia pig

Yellow fever
Yersin serum

VEGETABLE NOSODES

Ergotinum
Nectryaninum
Ustilago
Mucur mucedo
Malaria officinalis

SARCODES

Remedies made from healthy animal tissues and secretions.

Adrenalinum
Araneorum tela
Calc.carb
Calc.ova tosta
Carb.animalis
Castor equale
Cervus
Cholestrinum
Conchiolinum
Erythrinum
Feltauri
Gadus morrhiva
Helix tosta
Hippomanes
Homaros
Lac.can (dog's milk)
Lac def (Skimmed milk)
Lac fel (cat's milk)
Lac vaccinum (Cows milk)

Lac vacc coagulatum (Skimmed milk)
Lactis vaccini flocculati (milk cream)
Oleum jecoris acelli
Oophorinum
Orchitinum
Ovigallinae pelliculae
Ovigellinae testa
Pulmovulpis
Sanguisauge
Sphingarus
Thyroidinum
Urinum

SARCODE DERIVATIVES....

Preparations 'derived' from healthy animal tissues & secretions.

Cholestrinum	Pancreatinum
Lac vacc coagulatum	Saccharum lactis
Lac vacc defloratum	Thyroidinum
Lac vacc flos	Urea
Lacticum acidosum	Uricum acidum

KEYNOTES OF SOME IMPORTANT NOSODES

ADRENALIN (Sarcod)

Extract of supra renal bodies (Medullary part) C3 H3 A2 O3

Main action is on kidneys

Stimulation of sympathetic nerve endings. causing constriction of the peripheral arterioles with increase in BP

Many cases of Addison's disease have been cured

Head ache > by pressure on the eyes & wide opening of eyes

< by mental labor or in indoor

Sensation of thoracic constriction with anguish

It causes a very rapid increase in BP due to its action on the nerve endings in the vessel wall.

In chronic congestion of lung, asthma

Haemorrhagic condition not due to difficult coagulation of blood

Congestion of ethmoidal & sphenoidal sinuses with hay fever

Shock or heat flushes during anaesthesia

AMBRA GRISEA

(Probably a nosode)

By Hahnemann in 1827

A morbid product from the belly of the sperm whale- physet/macrocephalus

Probably a fatty excretion from the gallbladder

MIND :

Extreme nervous hyper sensitiveness in lean thin emaciated person

Unable to sleep after business embarrassment, music <

The presence of others even the nurse is unbearable during stool

Time pass too slowly with slow comprehension

ABDOMEN :

Distention of stomach & abdomen after midnight

GENITOURINARY:

Feeling in urethra as if a few drops passed out.

Urine turbid even during emission, forming a brown sediment

Nymphomania with itching & soreness of pudendum

Discharge of blood between period at every little accident

Thick bluish white leucorrhoea at night

RESPIRATION

Hollow spasmodic deep barking cough with hoarseness & eructation worse in presence of people

HEART :

Palpitation with pressure in chest as from a lump lodged there or as if chest was obstructed
Nux.vom antidotes the potentised ambragriesa.

ANTHRACINUM

J.W.Lux

From the spleen of cattle with Anthrax

Present preparation is from the liver of rabbit suffering from anthrax by subcutaneously injecting the culture, killed on the third day. The proof of anthrax infection is done by tracing the bacteria in the blood of the animal

The lower dilution may be repeated many times a day

Anthracinum is characterized by...

1. Indurated vesicular inflammation
2. Intensive burning pain
3. Irritating & fetid secretions

Indications..

- + In carbuncle, malignant ulcer, septic fever, cellulitis, felon, furuncle with ulceration sloughing and intense burning.
- + When Ars. or best selected remedies fails to relieve the burning pain
- + Suspicious insect stings, if the swelling changes color and red streaks from the wound map out of the course of the lymphatic
- + Malignant pustules, black or blue blisters fatal within 24 – 48 hrs.

ADLUMIA FUNGOSA

Mind : Absent minded

Mistakes during writing with irritability

Diminished desire with progressive ejaculation

Too frequent menses

Sleepiness after dinner with sleeplessness after midnight

GENERALS :

Desire for cold milk, cold milk which <

Desire to lie down, lying on abdomen >

Complaints from exposure to sun

Weariness in after noon

ASPERULA ODORATA

Nacent O2 - distilled water charged with gas

Leucorrhoea in young girls and uterine catarrh

AVIARAE...

Bird tuberculosis

Have a sure and faithful action in acute respiratory tract infections.

According to P.Jousset " Bacillinum indicated in case of mucopurulent expectoration of adults or old, Aviary in bronchopulmonary disease of children and in acute affections of adults, such as influenza, simulating some acute bacillary symptom.

Indications....

- + Asthma, anorexia & emaciation
- + Frontal headache with hot forehead, root of nose painful
- + Capillary bronchitis, bronchopneumonia, dry & painful cough with pain in upper part of chest.
- + Anosmia with pain in the root of the nose, with spasmodic sneezing followed by watery hyper secretion.

BACILLINUM

Burnett

Maceration of typical tuberculous lung

In USA it is frequently used as a preventive to tuberculosis

Its effects are similar to Tub koch

Its good effect is seen on the sputum which become decreased more aerated and less purulent

More useful in old people with c/c catarrhal condition

Many claimed a favorable effect in children who don't grow well, tubercule weakness and broncheactaeasis of children.

Bacillinum is characterized by...

Patient having the craze for movement

Intense headache < by the movement, absence of sleep during headache

Eczema eyelid, impetigo

Chronic cough with abundant mucopurulent expectoration.

Indications

RESPIRATORY:

Catarrhal dyspnoea, humid asthma

Bubbling rales & mucopurulent expectoration, offensive discharges from the congestive lung

SKIN :

Ring worm, pityriasis, enlarged tender glands

According to Boericke should not prescribe below 30 & not repeated frequently, rapid in action .

Recurrence of abundant tartar in teeth.

BOTULINUM..

There is no experimental pathogenesis, because the substance is extremely toxic. A toxin elaborated in putrefied meat of pork

This medicine is prescribed on pathological symptoms elicited from person intoxicated.

Expressionless face ,as if a mask after a paretic state

Liquid secretion from throat with great thirst & dysphagia

Double vision with Potts's

Gastric pain with retention of urine & stool

Respiratory paresis of speech & voice

CLINICAL DIAGNOSIS ..

+ Heine medin disease

+ Facial paralysis with ptosis

+ Diphtheritic paralysis

+ Chronic uremia

BRUCLLA MELITENSIS

The meliten is a filtrate of 21 days old culture of the microbe of undulating fever utilized for the diagnosis of the affections.

CLINICAL INDICATIONS...

+ C/C Malta fever

+ Mealer

+ Sub acute polyarthritis

+ Neurasthenia

+ Orchitis or orchyepidydimitis

CANCER NOSODES

Epithelomine _ Extract of epithelioma

Schirrinum - Extract of squirrh

Carcinosin - Extract of any kind of cancer.

CARCINOSINUM

Clinical researches are done by Foubister & Templeton

Carcinosin adeno stom - Adenocarcinoma of stomach

Carcinosin adeno vesic - Papillarr adeno ca bladder

Carcinosin intestinal comp - Intestinal cancer of different stocks

Carcinosin scir-mam - Scirrhous of mammae

Carcinosin squam pulm – Pulmonary cancer
Carcinosin

According to O.A.Julian – this nosode should not be given to a patient actually having cancer or suspected of being cancer, may result a violent reaction

A deep and long acting remedy

Indicated in individuals having a pale color of skin,childrens having tendency to numerous acute infantile affections especially pulmonary, with knee elbow position during sleep.

POSITIVE DIAGNOSIS :

Family antecedent _ Ca,DM,Tub,P anemia

Personal antecedents – W.cough,pneumopathies in lower age

Aggravation or amelioration on seaside

Desire for salt,sweets,egg,fruits etc.

Knee elbow position during sleep

When well selected remedy fails.

CLINICAL DIAGNOSIS

Allergic and tubercular conditions

Delayed milestones

Trisomy 21

Insomnia of children and old men

MIND : Children have great fear, sensitive to reprimands, but is sympathetic to others, mentally retarded child.

RESP : Asthma > on seaside

SKIN : numerous naevi,acne

GIT : Cancerous cachexia _ indigestion and accumulation of gas in stomach and bowel.

SCIRRHINUM

Cancerous affections, swelling and indurations of glands

Highly recommended in pinworm

Disposition to masturbation in children

Ca mamma and varicose vein

COLI BACILLINUM

Is prepared from the lysate from the addition of antiseptic from the culture made out of a mixture of several coli bacilli stokes mainly E coli and shigella.

POSITIVE DIAGNOSIS

+ Asthma, timidity and amnesia

+ Slow digestion, intestinal spasm and gurgling in the Rt caeco colic region

+ Frequent micturiation with burning pain in cost lumbar region of rt side

KEY SYMPTOMS

#. Swelling of upper eyelids

#. Tongue with a median glassy area without papillae.

INDICATIONS...

GENERALITIES

General fatigue and depression which goes on aggravates with the digestive and urinary troubles

Permanent worn-out condition

MIND

Empty feeling in the head, great timidity and indecision

Constant mental confusion with amnesia of recent happenings Schizophrenia ,depressive melancholia and OCN

HEAD

Unilateral swelling of upper eyelid with frontal and sub orbital headache

GIT

Hepatocholecystitis, chronic cholecystitis and appendicitis
Verminosis of children
Very slow digestion with heaviness remaining for a long time
Profuse weakening diarrhoea in babies and young children with
Hypothermia, bradycardia and dehydration

URINARY

Frequent micturition of little quantity every time with burning at the end of the flow
Sensation as if he must go again to pass urine immediately after micturition
Colibacillary pyelonephritis and relapsing epididymitis

SEX

Painful erection and ejaculation
Algomenorrhoea with yellow leucorrhoea
Vulvovaginitis with difficult sexual relations

LOCOMOTOR

Poly articular pain
Swelling of small joints of legs and hands

CHOLESTRINUM

C26 H44 O By Dr. wichelem Ameke

From epithelial lining of gall bladder and larger ducts
Highly recommended in Ca liver
Recurrent biliary colic, gall stone
Obstinate hepatic engorgements
An intercurrent to hepatitis

COLOSTRUM

Diarrhoea of infants, colic
The whole body smell sour

DE- OXYRIBO NUCLEIC ACID

MIND :

Irresolution, concentration difficult
Arrested development of children
Loss of will, somnambulism

FEMALE :

Yellow leucorrhoea during menses
Intermittent too late scanty menses

SLEEP :

Falling asleep is difficult
Frequent waking with sleepiness in evening
Amorous dreams midnight after

GENERALS :

Epileptic convulsions, osteomyelitis
Premature old age
Riding in a car >
Multiple sclerosis
Varicose vein with ulcerations

DENYS

The filtered bouillon of Denys was a tuberculin prepared after the separation of the microbes by filtration on bougie and non concentrated. It contains thermo labile toxalbumine which differentiates itself from classical tuberculin.

The clinical pathogenesis is by the observation of troubles caused by the abusive use of filtered bouillon.

POSITIVE DIAGNOSIS

Sudden pathological troubles, functional or lesional

Migraine with fever

Coryza with abundant aqueous discharge

Fever by the least effort

Gastric troubles and watery diarrhoea

Migraine irregulars intermittent comes suddenly of variable duration, 2-3 days, disappear and return at the end of 15 days even after 2-3 months in the same manner.

DIPHThERINUM

Prepared from diphtheric toxin diluted for intradermal reaction of Shick

POSITIVE DIAGNOSIS

+ Paleness, fatigue, anorexia

+ Red swollen tonsil with pseudomembrane

+ Chilliness, palpitation, hypertension

+ Paralytic troubles, sensitive motor nerves of the lower limbs

+ Sub febrile states

Indications...

Paleness, fatigue, anorexia in scrofulous psoric tubercular persons

Child is punny, rapidly fatigued doesn't like to play

Dark swelling of tonsils & palatine arches, parotid and cervical glands greatly swollen, thick dark grayish dipheretic membrane

Swallow without pain but fluids are vomited or returned by the nose

Breath horribly offensive

When the best selected remedy fails to improve or relieve.

Chronic tonsillitis without pain and salivation

DIPThERIO TOXINUM

Chronic bronchitis with rales

Cartier suggest it in the vagoparalytic forms of bronchitis in the aged

Also in toxic bronchitis of the aged

DT - TAB

DT-TAB is obtained from the anti-diphtheric, anti-tetanic and anti-typhoid paratyphoid mixed vaccine.

INDICATIONS...

Reappearance of a latent infection or aggravation of a known affection

Epileptiform or tetanic convulsions

Hebephrenia++, mental confusion with amnesia

Sudden hypotension with lypothymia, cyanosis, dyspnoea and inversion of the blood formula

Chronic albuminuria

Pathological sequel after DT-TAB

ELECTRICITY

By Caspari

Potencies are prepared from sugar of milk which has been saturated with current.

INDICATIONS...

+ Dread to approach of a thunder storm, suffer from mental torture before or during an electric storm

+ Heaviness and paralysis of limb and entire body

+ Intense nervous anxiety, timid fearful and sighing

+ Paralysis of single limbs mainly lower

+ trembling of the limbs which have received the shock.

ELECTRICITAS

Sugar of milk saturated with current

Anxiety, nervous strain, palpitation and restlessness

Dread of approach of thunderstorm

Heavy limbs

EGG VACCINE

BY Dr. Frih tacbot

For asthma in children

Asthma due to suceptability of protein substance in eggs can be cured by immunising against egg poison by repeated doses of egg white. After the skin has been cleansed with soap and alcohol, the egg white is rubbed in to a slight scratch

ELECTRON

A fossil renin

Nervous and hysterical symptom

Fear of train and closed places

Asthma and incipient phthisis, chronic bronchitis, w cough

Pain in chest

EBERTHINUM

Is prepared from the culture of mixture of many stocks of typhoid bacilli, presenting themselves in lysated suspension 10 milliards per cm³ of salmonella typhi.

There is no experimental pathogenesis according to Hahnemannian methodology

Similar to paratyphoidinum B

GENERALS

Fever rising upto 40, dicrotic and dissociated pulse

All psychosomatic affections, infectious conditions of which the aetiological idea goes on to an old typhoid

Encephalitis with intense prostration, mental confusion, acute psychosis

GIT

A/C angiocholecystitis and a/c hemorrhagic pancreatitis

Painless superficial egg shaped ulcerations of tonsil

CVS : Infectious myocarditis and nodulous peri arteritis

URINARY : a/c glomerulonephritis, red and deep colored urine

EPIHYSTERINUM

Obtained from a case of haemorrhage suffering from fibroid uterus with possibly malignant element

Highly useful in controlling uterine haemorrhage

Menses are frequent and profuse

Fibroma, menorrhagia and metrohagia.

ENTEROCOCCINUM

Is prepared from a mixture of many stocks of enterococcus mainly streptococcus fecalis

GEN : Fatigue, irritability, demineralisation from stools with mucorrhoea

GIT : Tongue 'white as milk' with nausea, anorexia, flatulence and eructation, stools like cowdung.

Morning diarrhoea with great urgency of many stools between 4-9 am

Highly recommended in colitis and enterocolitis, haemorrhagic and relapsing colitis.

FLAVUS

Is a bacteria called Nisseria pharngis, is an anaerobic saprophyte of upper respiratory tract of men. It is not considered as pathogenous.

There is no Hahnemannian pathogenesis of this remedy

GEN :

Depressive states, sensitive to emotions and contradictions

Periodical rt sided headache

Trembling localised particularly in fingers

GIT

Dental arthritis with loose teeth

Digestive troubles after meals

CVS & RESP

Palpitation at night with impression of having fever
Takes cold easily cough and expectoration in the morning
Sensitive heaviness in the larynx after talking for a time
Dyspnoea aggravation at 2 am,wakes up with suffocation

SENSE ORGANS

Nose: Spasmodic coryza ,greenish discharge with nosebleed in the morning congestion of nose at night,alternate stoppage
Eye : Rt.sided periorbital headache
Ocular fatigue with heavy eyelids
Ear : repeated otitis upto 25 times with rt sided otalgia
Urogenital : Late menstruation with premenstrual syndrome
Dysmenorrhoea,loss of blood during ovulation
Locomotor : Arthrosis of vertebral column with cracking, also in knees
Cervicobrachial neuralgia with sciatica

SKIN : Dehydrosis of the palms
A Lt.sided remedy

FEL TAURI

Oxy gall

Increases the duodenal secretion, emulsify fat and increase the peristaltic action of intestine. Liquefies bile and act as a purgative & cholegogue

Disordered digestion, diarrhoea and pain in the nape of neck are the main symptoms
Biliary calculi,obstruction of gall duct,jaundice
Tendency to sleep after eating
Eructation, violent peristaltic movement

FRAMBOISINUM

It was the serosity of pianoma taken from a non syphilitic subject
According to Baudre – it is a specific to pain
It is some what similar to psorinum
Chilliness often accompanied by lowering of temperature (C.veg)

GONOTOXICUM

Prepared from antigonococci vaccine
Similar to Medorrhinum
Yellow greenish urethral discharge
Burning during micturiation,flocculant turbid urine
Tumefaction of the urinary meatus of women
Congestion of pseudoglands and skin around the meatus
Relapsing metritis,cystitis and salpingitis

GADUS MORRHOEA

Cod
Frequent breathing with flapping alae nasi
Rush of blood to chest
Pain in lungs with cough
Dry heat in palms

HAFFKINE

Anti pest vaccine
No Hahnemannian experiment exist
According to Barishae – a specific for influenza in epidemic
Mesoencephalitis

HIPPOMANES

It is mucoid sticky white substance having the smell of urine which float in the amniotic fluid or is attached to the membrane of the fetal organ of the mare, towards the last month of pregnancy.
A trituration is prepared with the dried substance taken out of the tongue of a filly which has just born.

This has not received any trials clinically

Generals : Subject with pale face as if suffering from great weakness
Numbness of the body and the mind

Neuroendocrine :

Deep melancholic state, remain alone in a corner
Takes long time to sleep, insomnia in the several part of the night
Choreiform movement, strange sensation as if head will fall off
Acroparesthesia weakness of hand and fingers

GIT :

Desire for acids and horror for sweet things
Salivation increased with headache and sore throat
Sensation of spasmodic constriction in anal sphincter

UROGENITAL :

Frequent micturition in thin jets with effort
Loss of spermatic fluid after urination
Increased desire with prostatic heaviness

LOCOMOTOR

Violent pain in the wrist as from a violent sprain
Weakness of the whole leg, sensation of sprain
Cramps on fingers towards the end of the day

SKIN :

Hair fallout in bunches
Purities on the toes and between shoulders
Fever in the evening with persistent headache
A left sided remedy

HIPPOZAENIUM

Gladerine-mallein-frans
By Dr. J.J.Garth wilkinson

Mainly indicated in phthisis, chronic rhinitis, cancer etc.

Nose : Red swollen, catarrha, ozaena, bloody discharge around orifice
Tubercles on alai nasi, papoules and ulcerations in frontal sinuses
Face : All gland swollen and painful

Resp : Bronchitis in the aged with suffocation from excessive secretion bronchial asthma, cough with dyspnoea. Tuberculosis

Skin : Lymphatic swelling articular non fluctuating
Malignant erysepelas, pustules and abscess

HOMARUS

Digestive fluid of live lobster

A combination of dyspepsia, sore throat and headache may be controlled by this remedy

Sore throat, raw burns white tough mucus
Pain in the stomach and abdomen > by eating
Chilliness and pain all over, itching of skin
General < from milk and sleep
> by motion, after eating

HYDROPHOBINUM

Introduced and proved by Hering
Explained in 67 pages by Allen

Nearly 50 years after the experiment of Hering with the virus of hydrophobia, pasteur's work began.
According to Clarke " though the late evolution of lyssin is in striking contrast with the lightning like rapidity

of the effect of snake venom”

Contributed by – Schmidt, Behlert, Redmond, Cox, Kneer and Clarke

Preparation – Lysate of saliva taken from a rabid dog

POSITIVE DIAGNOSIS

- + Hydrophobia, irritability, rapid elocution
- + Increased sexual excitement and aphordisia with uterine prolapse in women
- + Spasm of organs – nervous, digestive, urinary..
- + All the uneasiness increase by looking at flowing water or bright light

CHARACTERISTICS....

GEN :

Lyssophobia, exceedingly apprehensive
Generalised hypersthesia caused or < by sight of water
Fear of bad news and fear of being angry
Sunstroke – cannot bear the heat of sun
C/c headache from bites of dogs < by light or water
Complaints from noise, light, water or thinking of it

GIT

Hypersecretion of a viscid frothy saliva
Spasmodic dysphagia, tendency to spit constantly
Spasm of oesophagus on swallowing liquids
Increased desire for stool on seeing or hearing running water
Desire for salt and chocolate
Aversion to water

RESP :

Painful throat, constant desire for deglutition in spite of the difficulty
Barking cough by seeing water

UROGENITAL:

Need for urination on seeing running water
Hypersensitive vagina coition become difficult
Uterine sensitiveness with prolapse
Complaints from abnormal sexual desire

SKIN : bluish color of wounds

Lyssin antidotes effect of bite of non rabid animals

Is an analogue of many animal and nearly all the serpent poison, especially Lachesis and Vipera.

INFLUENZINUM

By Pierre Schmidt

Prepared from an antigrippe vaccine prepared from 2 variety of viruses

An ordinary influenza APR-8 and the other A singapore-1 called asiatic influenza ; a mixture of 3 parts of asiatic virus and 1 part of European virus.

Paster institute prepare specially this vaccine mixture for Homoeopathic uses.

GEN :

General ill feeling with chill headache and diffused pain
State of jacquelin- burnad (extreme weakness)
Stimulative action in the cases of weakness and fatigue
Predisposition to hydrolipopexia by disthyroidia with the tendency to hypotension

NEUROENDOCRINE :

Post grippal depression neurosis
Encephalitic syndrome with vomiting
Headache of influenza

GIT : Enterocolitis and diarrhoea of influenza

CVS : Venous stasis of lower limb with varicose ulcer
Leucopenia with mononucleosus
RESP : Nasal voice
Stridulus laryngitis of children
Bronchial asthma and bronchopneumonia of influenza
EXTR : Infectious rheumatism

INGLUVIN

Made from gizzards of a fowl
Vomiting of pregnancy, gastric neurasthenia
Infantile vomiting and diarrhoea

INSULINUM

Dr.Wm.F.Baker

An active principle from the pancreas which affects the sugar metabolism
+ In the treatment of diabetes
+ Restoring the lost ability to oxidise carbohydrates and restore oxygen in the liver
+ Acne,carbuncle erythrema with itching eczema
+ In the gouty transitory glycosuria when the skin symptoms are present give three times daily
+ Highly usefull in persistent cases of skin irritation, boils, vericose ulceration with polyuria
Dose 3x - 30x

IODOTHYRINUM

The active principle isolated from the thyroïd gland rich in iodine and nitrogen

+ Affect metabolism, reducing wt., producing glycosuria
+ Milk containing the internal secretion of thyroïd
+ Use cautiously in obesity, for a fatty may not be able to maintain the accelerated rhythm.

KOCH'S LYMPH

In acute and chronic parenchymatous nephritis
Pneumonia, bronchopneumonia and congestion of lung in tuberculosis
Highly useful in lobar pneumonia and bronchopneumonia

LAC CANINUM

By Swan from Dog's milk
Allen explained in 47 pages
All milk product on proving produced 'biliousness, intestinal flatulence and obstinate constipation'.
Pain constantly flying from one part to another, changing from side to side every few hours or days
Decided effect in drying up of milk in women

MIND

Chronic blue condition
Despondent hopeless ,vision of snakes
Attack of rage, cross irritable child screams all the time

HEAD

Sensation of floating in air
Have a typical feature of migraine
Reverberation of noise

NOSE & MOUTH

Highly serviceable in attack of nasal obstruction
Alaenasi and corners of mouth cracked
Cracking in jaw while chewing
Putrid taste with profuse salivation after sweets

THROAT

According to Allen " Probably no remedy in the materiamedica present a more valuable pathogenesis in symptoms of throat".
Sore throat and cough with mastication

Painfull swelling ,pain extend to ears
Shiny glazed appearance in tonsillitis and diphtheria- alternating sides

FEMALE

Painful swollen breast before menses > by flow < jar
Galactorrhoea
Helps to dry up milk

EXTR

Rheumatic pain in extremities and back from one side to another
Rt sided sciatica with numbness in palms and soles
Spine very sensitive to touch or pessure.

LAC VACCINUM DEFLORATOM

By Swan

According to Allen " It is a well known facts that the chemical constituent of milk contain an epitome of the salts and tissues of the animal which secretes it,so the range of action is co extensive with the tissue salts".

Grauvogl suggest that hydrogenoid and cold children should not be given milk and burnett maintain that a milk diet even skimmed milk after the first year renders them susceptible to colds.

Explained in 34 pages by Allen

A remedy for disease with faulty nutrition,sick headache with profuse flow of urine during pain.

CHARACTERISTICS

- + American sick headache begins in forehead and extending to occiput, nausea vomiting with obstinate constipation
aggravation during noise and menses ameliorated by bandaging head tightly and by urination
- + Globus hystericus
- + Vomiting of pregnancy no relation with eating
- + Constipation with in effectual urging,large hard with great straining painful exorting cries lacerating anus,no stool
even after 10-20 enema per day last for 15 years
- + Menses delayed or suppressed by putting hands in cold water drinking a glass will suppress the flow until the next period
- + Dropsy from organic heart diseases, liver complaint far advanced albuminuria, following intermitent fever
- + Obesity, great weakness and prostration with loss of sleep.

LAC FELINUM (Cat's milk)

By Swan

MIND :

Fear of falling down stairs but without vertigo
Every little fault appeared a crime
Very cross to everyone

HEAD :

Terrible headache Lt sided, penetrating Lt eye ball to centre of brain Pain come with a constriction at the root of the nose

EYE :

Inclination to keep the eyes closed
Sharp lancinating pain through the center of the eye ball
Highly recommended for choroiditis by Swan
Cures various cases of corneal ulcers

MOUTH :

Sensation as if tongue were scalded by a hot drink
Mouth seems stick together
Small white ulcers on the whole buccal cavity

THROAT :

Stringy tough mucus,can't hawk it up, and has to swallow it

STOMACH :

Great desire to eat paper

Has to take off her dress & loosen clothes after eating

STOOL :

Natural stool very slow in passing, inability of rectum to expel its contents

FEMALE :

Leucorrhoea ceases on third day & re appear on 4th day,yellow

Furious itching of vulva,out side and inside

SLEEP :

Heavy profound sleep,not easily awakened

Dreams of earthquakes

Constant nerve trembling especially of hands as in drunkards

LAC VACCINUM (cows milk)

Burnett remarks as a clinical fact that children who drink much milk after their teeth are fully grown become liable to colds.

It develop or aggravate the uric acid diathesis, thus increasing the rheumatic tendency.

MIND :

Mental confusion _ lasted a long time after proving

HEAD :

Vertigo falls back ward if she close her eyes

Sensation as if fire ball in each temple simultaneously

EYES :

Blindness of both eyes,3 or 4 times in succession, lasting seconds

Then passes leaving a pain in each temple

MOUTH :

Acrid saliva staining handkerchiefs yellow

Ulcers on tongue breath extremely fetid, sensitive swollen tongue

Slimy white mucus on parts not ulcerated

Increased thirst, drink 3-4 tumblers during evening

ABDOMEN :

Constant intolerable flatulence begins an hour after eating drinking milk for lunch and last all the afternoon

Borborygymus with loud noisy rumbling

Obstinate intolerable constipation with much flatus

URINE :

In diabetes mellitus

Frequent discharge of clear urine, colorless, no sediment

FEMALE :

Drinking milk suppress the flow until the next period

White watery leucorrhoea with pain in sacrum

CHEST :

Sharp pain in lower part of chest, moment or not returning pain

EXTR :

Aching pain in both knee like rheumatic pain which begin

Simultaneously on both knees but Rt was more affected

SKIN :

Brown crust having a greasy appearance, especially in corners of mouth _ butter sore

GEN :

The pain in all part of the body felt simultaneously on both sides

LACC VACCINUM FLOS

Cream

Diphtheria,leucorrhoea,menorrhagia & dysphagia

LIQUOR AMNI

Desire for activity

Restlessness before menses

Disturbed and restless sleep

LEPTOSPIRA (Ictero _ haemorrhagica)

Obtained from a lysate of leptospira ict. Diluted and dynamised according to Homoeopathic pharmacological procedure.

Leptospira seems to be a great therapeutic value in acute or sub acute hepatobiliary affections.
Of great value in degenerative process of hepatic function

POSITIVE DIAGNOSIS

- + Asthma with pseudo grippe state
- + Jaundice, musculoarticular pain
- + Nasolabial herpes
- + Syndromes of meningitis

INDICATIONS..

Pseudogrippal state with chill headache diffused pain and asthenia

Morbiliform eruption in erythrematous patches

Syndromes of meningitis with headache vomiting and myalgia rachialgia and fever.

GIT :

- Relapsing infections, weil's disease
- Intense jaundice (cutaneomucus)
- Stool normal, very deep colored urine

EYE : Conjunctivitis with photophobia

EXTR : Musculoarticular pain

BIOLOGICAL CHANGES :

Polynuclear hyperleucocytosis

Hyperbilirubinemia with transaminase normal or moderately increased

Hyperazotemia, albuminuria and cylinduria

CLINICAL DIAGNOSIS :

- + Epidemic encephalitis
- + Curable lymphocytary meningitis
- + A/c angiocholecystitis and haemorrhagic pancreatitis
- + Muscular rheumatism

LUESINUM / SYPHILLINUM

Leusinum is prepared from the serosity of treponema of syphilitic chancre

Hepatoleusinum – Liver of heredo-syphilitic

Rachi leusinum _ Cephalorachidian liquid of syphilitic

In 1830 Lux suggested the therapeutic use

Swan published the first pathogenesis

1891 A clinicotherapeutic study by Dr. Thomas Wildes

Points to Remember..

- #. Syphillinum is a 'royal' remedy of very rapid action
- #. It should not be prescribed only on aetiological basis
- #. It is of no importance whether syphillis is a hereditary element
- #. It is the remedy of children on first and second infancy
- #. It is the cancer child who lag behind in the class, whose results in grammar, language and maths makes the teacher & parent hopeless
- It is the child who always cries, one cannot understand by which end to catch him because mildness and scolding has no effect on them.
- #. Bone affections specially of long bones require frequent prescription of syphillinum
- #. In old syphillis having irreducible serology, this may require
- #. Hereditary tendency to alcoholism

POSITIVE DIAGNOSIS..

- + Nervous subject with obsessional ideas, stereotyped
- + Amnesia of proper names
- + Intellectual paresia with particular difficulty in maths & language

- + Nocturnal linear bone pains, cutaneous indurations
- + nightly aggravation of all the symptoms

INDICATIONS... GENERALS

In children _ Psychomotor retardation

In adults_ Changing humor, stereotyped rigidity because of tendentious osseous pain especially of long bones < at night,

Sunken besotted appearance, puny with protruding eminences

Great falling of hair with severe headache at night.

NEUROPSYCHIC SYSTEMS

#.OCN, Aproxia & Insomnia

Loss of memory even for familiar things, arithmetical calculations difficult.

Awkward gestures, no sense of discipline

All complaints aggravate at night, patient wakes up in the morning completely worn out

Depressed, fear of being mad

OCN, retarded intellect

Delayed growth of the child, static troubles of spine

Facial neuralgia of right sided

Insomnia between midnight and 6 am with restlessness and bone pain

GIT :

Hutchinson's teeth, decayed at edge of gum and break off

Sensation of worm moving in the teeth

Cracked fissured burning painful tongue, with fetid breath and excessive salivation

Great desire for alcohol, dislike meat

Ano rectal fissure ulceration and fissures

Dislike washing

Bleeding haemorrhoids with burning and pricking pain

Chronic stubborn constipation with fetid breath

RESPIRATION :

Ulceration of the vocal cord

Aphonia in women before menses

Chronic asthma and night cough in summer, in hot humid weather

SENSE ORGAN

Burning coryza with yellowish greenish irritating discharge

Repeated formation of dry and adherent crust in nostrils

Bilateral or unilateral ptosis, patient seems sleepy

Vertical diplopia, unequal pupil and ocular pain

Chronic otalgia with right sided otorrhoea

Progressive deafness.

UROGENITAL :

Slow and difficult micturition, must press, nocturnal enuresis

Chronic inguinal adenopathy with indurations of spermatic cord & testicles

Narrowing of the vagina with indurations of the neck of the uterus

Abundant leucorrhoea soaking through the napkin & running down heels worse at night with lumbar pain

Pruritis and ulcerations of the vulva

LOCOMOTOR

Cervico dorsal pain < night, movement > heat

Scapulohumeral pain, pain at the insertion of deltoid < night, rising from bed > walking during the day

Bone pain of the tibia at night

Painful contraction of muscle and tendons at night

SKIN :

Great falling of hair with premature grayness

Pustular eruption of skin, brown reddish with coppery spot

Abscess with fetid discharge

_ Predominantly a right sided remedy

MAGNETIC POLY UMBO...

- #. Burning lancinating through the body
- #. Pain as if broken in joints
- #. Headache as if nail were driven in
- #. Cicatrices break open

Symptom produced by touching either pole of the magnet, indiscriminately or by lying whole magnetic surface upon the body.

The potencies have been prepared by triturating sugar of milk which had been saturated when exposed to the emanation of the magnet.

A better logical introduction of the pathogenesis of the magnet as a whole, and of each pole of separately is available in the materia medica pura by Dr. Hahnemann.

MIND AND DISPOSITION :

Hurried heedlessness and forgetfulness, while attending his business he talk aloud himself, without being aware of it. Unable to fix his attention on one object
When walking he staggers from time to time without feeling giddy

HEAD :

Headache occasioned by least chagrin, as if a sharp pressure were made on small spot in the brain
Sweat in the face without heat, early in the morning

EYE :

Dilated pupil with cheerfulness of mind & body
Firy sparks before the eyes, like shooting stars
Itching of the eyelids & eyeballs in the inner canthus

EAR :

External ear feel hot to him, but is not hot
Loud strong whizzing in one of the ear accompanied with headache of the same side

NOSE :

Illusion of smell, smell of manure before the nose from time to time

TEETH & JAWS :

Little ulcers on the lower lip, painful to touch
Metallic taste on one side of the tongue
Darting tearing pain in the facial bone, the coldness rushes in to teeth when taking a cold drink
Uniform pain in the root of the lower incisors

GIT :

Ptyalism every evening with swollen lips
Continued fetid odor from mouth
Hunger increased in the evening
Aversion to tobacco
Frequent attack of unsuccessful and imperfect eructation
Loud rumbling in the abdomen, qualms with pain
Crepitation as if the rectum were continued and contracted
Itching haemorrhoids with pain, rectal prolapse during stools

SEX :

Early morning burning in seminal vesicles
Want of sexual desire, aversion to an embrace
Nightly emissions
Prepuce retracts entirely behind the glans
Intermittent menstrual bleeding

RESP :

Mucus in the trachea which is easily hawked up
Violent fits of convulsive cough with profuse expectoration of blood

Violent oppression of chest, beating in shoulders

BACK :

Pain in sacrolumbar articulation in the morning when stooping long time

EXTREMITIES :

Pain in humeral articulation or in the ligament

Uneasiness in the sound arm

Burning and cutting in the arms and chest with cold shuddering

Deep seated pain in the arm upto elbow

Drawing pain from head down to the tip of the fingers

Cramps in the calves and toes after walking

Severe pain under the nail of the big toe

SLEEP :

Coma vigil early in the morning for several hours

Dream full of feasting boasting and bragging

Sleep on his back one hand under of the occiput, the other over stomach,

knee being a part, moaning inspiration and half open mouth with low muttering amorous dream.

SKIN :

The recent wound continues to bleed again

Boils break out on various part of the body, passing of soon

Extremely itching eruption were the magnet lay, skin under the magnet is painful and corroded

Corrosive itching in various parts of the body

GENERALS :

Bruised and paralytic pain in all joints, sprained feeling on moving

Shuddering jerking movement all over the body

Place where the magnet had been imposed going to sleep became numb and sensible

The upper part of the body is spontaneously lifted upwards and jerked

Loss of consciousness with staring eyes and open mouth Insensibility and deadly sopor.

MAGNETIC POLY ARTICUS (North pole of magnet)

Disturbed sleep, somnambulism

Cracking in cervical vertebrae

Sensation of coldness, tooth ache

MAGNETIC POLY AUSTRALIS (South pole of magnet)

In growing toe nail with sever pain

Easy dislocation of the foot

Feet painful when hanging down.

MALANDRINUM (Grease of horse)

J.H. Clarke says " It has been used on infertile ground with great success in bad effect of vaccination. I had cured with it cases of unhealthy dry rough skin remaining for years after vaccination, in smallpox, measles and impetigo."

Impetigo ecthyma fat greasy looking pustular eruptions are greatly affected by this remedy

A very effective product against vaccination and small pox

Efficacious in clearing of the remnants of cancerous deposits.

MIND :

Confusion and lassitude of mental faculties

Comprehension is difficult , memory weakened and impaired

HEAD :

Pustular eruption on scalp, excessively oily dandruff (something peculiar) with itching of scalp

Headache and backache, stiffness of neck, loss of appetite constipation and great weakness (following vaccination)

GIT :

Very stubborn case of aphthae with halitosis
Severe ulcerated sore throat _ shifting type
Scorbutic gum unable to brush from soreness and bleeding
Darkthin cadaverous smelling diarrhoea.

SEX :

Child constantly handle the penis
Virgin covered with thick impetigious crust, yellowish green

EXTR :

Intense backache as if beaten especially sacral region
Large blisters on soles of both feet,deep rhagades
Soles of feet bathed in sweat,scald and burn when covered

SKIN :

Dry scaly itching rhagades of hard more in cold weather and from washing.
Toes feel scalded and itch terribly
Bone like protuberances.

MALARIA OFFICIANALIS

A badly defined nosode

Dr.Bowen conceived the practicability of testing the effect of artificial toxin prepared from a peat or decayed vegetable matter,taken from a marsh during dry season, when the malaria toxin was most active.

POSITIVE DIAGNOSIS

- + Sensation of general weakness, paleness
- + Occipital headache with vertigo and nausea
- + Troubled sleep with sensation of rolling as if on waves
- + Weak respiration with hawking explosive cough
- + Frequent bloody morning diarrhoea,liver and spleen painfull
- + Fever coldness then heat and abundant perspiration
- + Sensation of dryness in the mouth with pasty humid saliva

MILLEINUM OR HIPPOZAENIUM

Lux prepared some dilution of nasalmucosa of horse suffering from glanders, which is called ozenine.

The experiment of Hering being exclusively clinical,that there is no real pathogenesis.

Source _ Some lysate obtained from the glanders of horses.

INDICATIONS..

Consumptive state in grave disease like Tb,cancer or syphillis
Painful swelling of parotid and submaxillary gland
Chronic rhinitis, corrosive nasal secretions,congestion and ulceration of mucosa with nodosities
Spasmodic cough with noisy respiration and abundant expectoration.

MEL CUM SALE

Honey with salt

Prolapsed uterus and chronic metritis, associated with sub involution and inflammation of cervix

“ Soreness across hypogastrium from ileum to ileum”

Uterine displacement

Sensation as if the bladder was too full,pain as if in the ureters

MARMOREK (Serum of marmorek)

Marmorek in 1903

The serum was obtained from horses, vaccinated by filtrates of young cultures of tubercle bacilli.

The preparation of Marmorek requires a drainage first of all

POSITIVE DIAGNOSIS

- + Adenopathies of ganglion

- + Anorexia with hypotension and emaciation
- + Dryness of skin and mucus

INDICATIONS..

- % Fever without precise aetiology
- % Repeated coryza and dental troubles
- % The constipated
- % Cardiac neurosis

General Symptomatology

- Lean pale anxious nervous person
- Emaciation, febrile conditions
- Stubborn constipation
- Axillary pain with sub maxillary adenopathy
- Dental pain due to demineralisation
- Athralgias,tubercular osteitis with fistula
- Granite like features of the skin

MEDORRHINUM / GLINICUM

The name Glinicum by Burnett

Prepared from a lysate obtained without addition of antiseptic, from purulent urethral discharge of a blenorrhagic of several patients during discharge.

According to **H .Burnad** " An active and faithful remedy and helps as an amelioration or cure when correctly prescribed".

In babies especially useful in eczema of buttocks

In allergic condition following antibiotics

In chronic urethritis ,gonorrhoea or not it is very nearly associated with Argentum nitricum

For the constitutional effect of malnutrition or suppressed gonorrhoea

POSITIVE DIAGNOSIS

- + Hasty subject with amnesia of recent events, weeping
- + All complaints > by seaside
- + Better by knee elbow position
- + Musculoarticular pain,burning of the small joints and backbone
- + Wolf hunger,craves alcohol, defecation easy by bending backwards
- + Itching, dermomucus growth with smell of brine
- + Growth of warts & polyps
- + Tip of nose,phallus and breast are cold.

INDICATIONS...

GENERALS :

- Busy, hasty, irritated in the morning
- Child is anaemic,polyadenopathic,big head with recurrent colds
- Babies have red buttock.irritation around anus
- Degenerative tendency of reticulo endothelial system
- Women with c/c ovaritis,salpingitis,cystitis etc.

NEUROENDOCRINE

- Amnesia with mental confusion
- Permanent frontal headache, nausea < by bending forward
- Headache and diarrhoea from jar of cars
- Trembling all over,intense nervousness & profound exhaustion.

GIT :

- Throat constantly filled with thick grayish bloody mucus
- Constant thirst, dream she is drinking
- Insatiable craving for liquor,salt,sweet etc.
- Contraction and inertia of bowel with ball like stool
- Sharp needle like pain in rectum with oozing of moisture

RESPIRATION :

Dyspnoea and sense of constriction, can inhale no power to exhale
Dry incessant severe cough, like coughing in a barrel , at night
> by lying on stomach
All respiratory complaints > by seaside
Incipient consumption, sepsis in middle lobe.

GENITOURINARY :

Renal colic ,Backache > by urination
Nocturnal enuresis when the best selected remedy fails

MALE :

Seminal loss at night with great weakness
Impotence following dragging gonorrhoea
Wart formation on scrotum

FEMALE :

Dysmenorrhoea with sacrococcygeal pain > by folding thigh on belly
Intense menstrual colic with dragging up of knees, stains difficult to wash out.
Breast cold as marble, sensitive to touch
Warts in penis & vulva

LOCOMOTOR :

Great pain of the heels & soles
Shoulder pain and pain of the small joint
Neuralgic shifting type of pain
Intense restlessness, fidgety legs & feet with sever burning
A/c rheumatism < by movement
C/c rheumatism > by movement
Ankle turn easily when walking
Lumbar vertebrae sensitive and painful to touch
Deformity of finger joints with rigidity

SKIN :

Coldness of some localised region
Great pruritis ,broken deformed nails with transverse ridges
Mucus and skin growth-pedicular warts & polypus
Relapsing herpes of lips
Senile pruritis, persistent eczema of children.

MENINGIOCOCCINUM

The stock is a lysate obtained from the culture of a mixture of many stocks of meningiococcin.

A gram negative diplococci

The meningiococci is the host of rhinopharynx, hence its pathogenic power in the rhinopharyngitis, cerebrospinal meningitis , septecemia and waterhouse friderischen syndrome
May indicated in acute meningitis-cerebrospinal

MONILIA ALBICANS OR CANDIDIA ALBICANS

Its Homoeopathic preparation is made from a lysate of culture of monilia albicans supplied by pasteur institute.

INDICATIONS :

GEN :

Allergesomesynchymatous subjects (Psorosycotic) with pathological remenants on skin

GIT : Aphthous stomatitis with vesicles, white deposite and fetid breath

Bleeding gingivitis

Painfull spasmodic enterocolitis

GENITAL :

Vulvitis and lichenoid vaginitis with vesicles & pustules

Intense oozing and itching which may end in keratinisation

SKIN : Eczema with characteristic linear fissure localised in the folds of skin & mucosa.

Interdigital eczema with maceration of the skin
Periungual inflammation and onychomycosis
Symmetric eczema of thorax, arms and forearms
Dermatosis after antibiotics

MORBILLINUM

By Gross

Morbillinum is prepared from the exudates of the mouth and pharynx of patient suffering from measles and not yet treated.

There is no experimental pathogenesis

GEN :

Sequela of measles
Hyperthermia upto 39*c
Nasal & ocular catarrh
Diffused bronchitic rales
Spontaneous abortion

GIT :

Small white patches surrounded by red areola in mouth_Koplik's spots
Abdominal pain localised on the appendicular region

RESP :

Hypertrophy of the superficial glands of the neck
Diffused bronchial rales and densified murmurs
Purulent pleuresy

SKIN :

Miliary confluent scarlatiniform eruptions
Erythematous lupus
Phlyctenular conjunctivitis

MUCOR _ MUCEDO

Lysate is obtained by isolating and transplanting the mushroom Mucor -mucedo from the medium of culture at 25*c.

GEN : Asthenia, anaemia and emaciation

Decalcification with phosphaturia
State of mycosycosis of Jean fallax

SENSE ORGANS :

Chronic otitis, dragging and suppurating
Vegetative adenoids on nose
Adenoiditis during the pushing of teeth
Hypertrophy of tonsils

FEMALE :

Hyperfolliculinsm
Catenemia, sinusitis and angina with leucorrhoea

MUCO TOXINE

Lysate of culture of Micrococcus cattarhalis of pneumobacilli of Fredlander and the tritrogenous micrococcus.

INDICATIONS :

Acute or chronic bronchitis of the mucocatarrhal form in children and olds.

OSCILLOCOCCINUM

"Influenza at the beginning as a preventive as well as during convalescence". P.Schmidt.

Oscillococcinum is an autolysate filtrate from the liver and the heart of a duck.

This is a faithful remedy at the beginning of influenza, to cut short the manifestation at the beginning of otitis.

POSITIVE DIAGNOSIS

Paleness, asthma., hyperthermia
Occulonasal catarrah
Laryngiotracheaobronchial caseation
Painful congestion of tympanum
Gastrointestinal troubles of influenza
Varicose ulcer

GENERALS :

Tubercular patients, sensitive to cold, weather changes
Influenza, gastrointestinal type
Laryngiotracheobronchitis
Obstinate, fastidious & busy maniac
Is afraid of a storm
Vericose ulcer in legs

GIT :

Can digest neither milk nor egg
Abdominal cramping pain followed by fetid diarrhoea
Stubborn constipation

RESP :

Occulonasal catarrah, snuffles
Nasal voice, aphonia, dry painful cough, may with muco purulent expectoration.

ORCHITINUM

Testicular extract
After ovariectomy sexual weakness and senile decay
To increase sperm count

OZONIUM

Sacral pain
Tired pain through paelvic viscera and perinium

OSTEOARTHRITIC NOSODE

By Dr. Srinivas (Madras)
From synovial liquid of articulations

O A N : Osteoarthritic nosode, osteoarthric synovial tissue of knee

R A N : Rheumatoid arthritic synovial tissue

POSITIVE DIAGNOSIS :

Weakness with state of indifference and irritability < in the evening
Redness & swelling of the articulations, mainly Rt sided

GENERALITIES:

Extreme weakness with somnolence in the afternoon & profound sleep
State of indifference
Irritability < towards in the evening
Great desire for sleep with deep sleep at night

LOCOMOTOR :

Pin in Rt shoulder, rt hip, rt wrist with redness
Pain in tendoachiellis
Pain < by first movement > by continued motion
Muscular rheumatism, tendonitis and infectious arthritis

SKIN : Furuncle in the rt side, rt calf, rt arm etc.

OVI GALLINAE PELLICULATA

Membrane of egg shell

- + Sudden pains, bearing down sensation
- + Pain in heart and left ovary
- + Back ache and pain in left hip

OURALINUM OR PAROTIDINUM

Lysate from the saliva of patient suffering from mumps, diluted and dynamised according to Homoeopathic principles

Bilateral painful tumefaction of parotids and testicles with hyperthermia
Painful abdominal syndrome with hypermylasania, glycosuria (temporary), pancreatitis
Meningitis with hyperalbuminaria
Encephalitis followed by blindness or deafness

OOPHORINUM

Ovarian extract
Complaints following ovariectomy
Climacteric disturbances, ovarian cyst
Prurigo, acne rosacea

PARATYPHOIDINUM. B

Is prepared from the cultures from a mixture of different stocks of paratyphoidinum

GENERALITIES :

Chronic cancerous state and chronic mesenchymatoses (sycosis)
Recent or old history of salmonella infection
Prolonged pyrexia without any apparent cause
Chronic state of marasmus following an ancient salmonella infection (typhoid or paratyphoid)
Continues headache, generalised sometime with vertigo
Frequent insomnia, accompanied by loss of appetite and nausea

GIT :

Acute cholecystitis subacute or chronic
Summer enteritis
Haemorrhagic recto colitis

CVS & RESP :

Phlebitis of the lower limbs
Pulmonary congestion and bronchopneumonia appear and disappear rapidly
Dragging and sub acute pyrexias
Pneumonia and pleuropneumonia with slow resorption

EXT :

Purulent arthritis of knee
Vertebral & polyarticular OA

PERTUSSIN

Pertussin is prepared from the lysate obtained, without addition of antiseptic, from the expectoration of the patient suffering from whooping cough not yet treated.

CLINICAL PATHOGENESIS :

Tuberculus state

#. Syndrome of jacquelin burnad (Atypical tuberculosis of the sub febrile form, general torpid toxaemia of slow evolution

with broken-down constitution)

#. Whooping cough

#. Spasmodic cough of person suffering from bronchitis or tuberculosis

#. Encephalopathy specially when there is whooping cough is an antecedent.

- #. Dry cough spasmodic of different intensity, come suddenly
- #. Epilepsy, repeated fits which ends in rejection of mucus and vomiting.

PITUITARIA GLANDULA

Pituitary gland

Have a superior control over growth and development of sexual organs
Stimulate the muscular activity and overcome uterine inertia

- + Marked action on unstriated muscular fibers
- + Cerebral hemorrhage, check it and help in the absorption of clots
- + Uterine inertia in the second stage of labour, when the os is fully dilated
- + High BP, acute nephritis and prostatitis
- + Vertigo, difficult mental concentration, confusion & fullness
- + Use in 30th potency

PITUITARINUM

A vasoconstrictor and parturient

Help in uterine delivery, check bleeding after delivery

1ccm intravenously stimulate labour pain during expulsive period

Contra indicated in myocarditis, nephritis and arteriosclerosis.

A watery solution is made from the posterior portion of the gland is put up in ampules containing about 15 minims each and is considered as hypodermic dose. No effect per os.

PNEUMOCOCCINUM

Is a bacteria of diplococcus, it is found in 50% cases, in the saliva of healthy persons, in the nasal mucosa, mucosa of pharynx and conjunctiva.

POSITIVE DIAGNOSIS

- + Depressive condition, with pains of which the seats may be on any part of the cervicodorsal region
- + Respiratory troubles, mainly of bronchitis
- + Palpitation with focal block, relieved by cardiogram
- + Dysmenorrhoea with delayed menses & premenstrual syndrome

CLINICAL DIAGNOSIS

Depressive condition with anxiety

Desire to remain at home, horror of going out

Great feeling of being ill and death

Sensation of some liquid in head when bending down

Frequent headache in the nape of the neck, < by noise

CVS :

Precordialgias, puncturing pain

ECG reveals rt. focal block

Palpitation compel to stop walking

RESP :

Incessant cough without expectoration, specially at night with nausea

Cough by heat while entering in metro

Much cough following frequent bronchitis during pregnancy

UROGENITAL :

Short menstrual cycle remaining for 2 days

Burning during coition when fatigued

Sensation of heaviness in uterus (crosses the leg)

Frigidity and menstrual migraine

EXTR :

Cervicoarthritis

Dorsolumbar arthrosis

Cannot stand erect because of pain in neck
Legs heavy in the morning while wakening up

PSORINUM

Main contributor is Hering

Psorinum is prepared from the lysate stock obtained without addition of antiseptic, from the serosity of the furrows of the itch taken from a patient, not yet treated.

CLINICAL PATHOGENESIS

GENERALITIES :

- + Hypertonic, sad desperate, lean or emaciated having dirty look
- + Everything irritates him, quarrelsome startles at the least noise
- + Gen. weakness, chilliness, itching, bad smell of the body, fetidness of the eruption, profuse sweat, dry dirty rough skin, loss of reaction and morbid metastasis
 - + In c/c diseases when well selected remedies fails to relieve or permanently improve
- + Misanthrope with a clear inferiority complex, hopeless failing memory
- + Nominal temporary aphasia, defect of comprehension and of using words
- + Early senescence (old age), religious melancholy
- + Dreams of business, thieves, voyages and dangers

HEAD :

Periodical migraine, frontal or occipital type often concomitant with hunger pain > by eating > by epistaxis
Should wake up night for eating
Migraine after suppression of an eruption or menstruation
Violent pain in the head as if beaten by a stick
Pain in temples after intellectual effort, dry lusterless hair, plica polonica

GIT :

Swelling of the upper lip, acid eructation with bad taste in the mouth, voracious appetite and sticky saliva.
Taste of oil in the mouth, dry the whole afternoon
Constipation with rectal atony forcing the patient to make some effort to pass stool which is normal
Diarrhoea with urgency for putrid stool
Diarrhoea, vomiting & dehydration in the cholera of first stage

RESP :

Quinsy not only to relieve the pain, but eradicate the tendency. Severe pain and difficulty on swallowing.
Big tonsils, sticky mucus coming from the back of the throat
Cough with greenish yellow expectoration with nausea and vomiting
Hay fever, cough return every winter
Asthma, dyspnoea < in open air, sitting up by lying down and keeping the arm stretched far apart
Alternating asthma and eczema without complete disappearance of one or of the other

NOSE :

Chronic congestion of the nasal mucosa, nose stuffed discharge of bad smelling retro nasal liquid, loss of smell
Sneezing without cold, hypertrophied nasal mucosa

EYES :

Eyelids sticks in the morning, redness of borders of lids which sticks together
Photophobia, ocular fatigue towards the end of the day
Lachrymation if looking fixed for a time
Relapsing pterygium

EAR :

Chronic otorrhoea with discharge of pus, yellow brownish fetid for years, mainly in children
Pruritis and pain of the years

UROGENITAL :

Burning urethra before and after micturation
Involuntary urination, urination after

Marked repulsion of all sexual act
Genital organs are soft and lax
Frigidity with sensitive breast, prurigated nipple and hypermenorrhagia
Leucorrhoea of an intolerable odor at climaxis
Most obstinate morning sickness

EXTR :

Weakness of all the articulations as if they are going to crumble down
Hurts easily the heels

SKIN :

Dirty skin. oily oozing, unhealthy smell
Abnormal tendency to recur skin diseases
General pruritis < by heat of bed
Multiform and seasonal eruption especially on winter
Eczema of the integument with brittle hairs < at night
Formation of sub cutaneous nodules on the face.

PANCREATINUM

A combination of several enzymes
+ Imperfect digestion,lienteric diarrhoea
+ Pain an hour or more after eating
+ Better if not given in the active period of digestion

PEPSINUM

+ Imperfect digestion with pain in gastric region
+ Marasmus in children who are fed on artificial foods
+ disase of pancreas, gout and diabetes
+ Diarrhoea due to indigestion

PARORTIDINUM

A nosode of mumps
Indicated in mumps, can be repeated every 4 hours
In complication of mumps like orchitis and cerebral inflammation
A prophylatic against mumps

PYROGENUM

Pyrogenum is prepared from a stock obtained by the mixture of autolysis of flush of beef,pork,human placenta etc.

POSITIVE DIAGNOSIS

+ Oscillating fever, pulse very rapid (dissociated with temperature)
+ Restlessness and painful sensation
+ Fetidity, putridity of breath, of evacuation

"Pyrogen is the great remedy for septic state with intense restlessness, in septic fever especially puerpral,pyrogen has demonstrated its great value as a homoeopathic dynamic antiseptic."- **H.C.Allen**

GENERALITIES :

Key symptoms

Ø Dissociation of the pulse(rapid) and of
Ø temperature
(tendency to hypothermia)
Ø Putrid breath & discharges
Ø Restlessness
Ø Temp 103-106
Ø Pulse 140-170

The patient think that his personality is changed when turning from one side to another
At night bed feels too hard
Loquacious, cannot sleep because his mind is full of obsessive ideas

GIT :

Horrible breath,repulsing,fetid and putrid
Large flabby smooth varnished fiery red tongue
Sweetish terribly fetid pus like taste
Horribly offensive painless involuntary diarrhoea
Constipation with complete inertia,large blackstool
Vomiting from impacted or obstructed bowel

RESP :

Cough with abundant expectoration of putrid mucus < in hot room, movement
Taste of pus while coughing
Distinct consciousness of heart

FEMALE :

Localised mastitis, abscess of breast
Fetid leucorrhoea with septicemia and abundant sweat
Fetid menses with fever,dark uterine bleeding

SKIN :

Cold livid with abundant fetid sweat
Persistent varicose ulcer, late to cicatrices in old men

RIBONUCLEIC ACID (RNA)

MIND :

Difficult learning and studying due to difficult concentration
Shrieking at trifles
Indifferent, quarrelsome and weeping
Increased desire in both sexes
Sleeplessness after midnight

GENERALS :

Children affections in general
Aversion to fat and prickles
Desire sweets and vinegar
Hypotension with lassitude
Varicose vein with ulceration
Lying on abdomen > on back<

SCARLATINUM

Lysate from the squamous of a patient suffering from scarlatina diluted and dynamised according to homoeopathic principles

CLINICAL PATHOGENESIS

+ Delayed sequela of scarlatina
According to Reckweg – Cardioneurosis
Coronary troubles & angina
Thrombopenic purpura,polyarthritis,psoriasis,albuminuric nephritis

+ Erythrematous angina,painfull with dysphagia
+ Tumefaction of tonsils ,cervical adenopathy
+ Granite look of skin,small plaques of diffused erythrema
+ Arthralgia,rheumatism of fingers & hands
+ Since scarlatina the general condition bad every year of after angina + pencillin

SERUM OF ANTI CO-BACILLARY

By Martiny & Fortier Bernovellie

Is a purified form of the stock of serum anticobacillary of caprine origin.

Key words

A sure therapeutic action in acute or sub acute salpingitis,in pyelitis, pyelonephritis or cystitis
In c/c cases as anxiety neurosis, depressive neurosis and stupor stage
Hypo nutrition and colibacillary otitis in babies

POSITIVE DIAGNOSIS

- + Corticosomatic liability with the tendency of neuromuscular imbalance
- + Envy,doubt,phobias,loss of memory & frontal headache
- + Laryngotracheal irritation and GIT dystonia
- + Diminution of libido,salpingio oophritis

CLINICAL PATHOGENESIS

GENERALS :

Allergeso tuberculosic state

Vasomotor troubles of peripheries, mainly on lower limbs

Doubt leads to scruple,scruples to phobia and nocturnal anxiety

Prostrated distress, face with painful impression due to moral distress

Frontal headache with vertigo and intense torpor

GIT :

Swollen gallbladder, angiocolitis and biliary lithiasis

Gastro enteritis,atonic constipation and verminosis

CVS :

Hypotension & tendency to collapse

Moderate cyanosis with swollen ankles

RESP & SENSE :

Laryngotrachitis,ethmoidal sinusitis

Purulent nasal discharge when bending the head forward

Painfully sensitive conjunctivitis

Otitis of babies – painful congestion of tympanum

UROGENITAL :

Frequent micturation

Clear diminution of libido,pain after ejaculation

Yellow irritating leucorrhoea with decrease desire.

SEPSINUM

A toxin of proteus vulgaris,prepared by Dr. Shedd

Same symptom as pyrogen,which is the main constituent

SERUM OF YERSIN

Serum of yersin is derived from the antipest serum supplied by Pasteure institute. The serum obtained from animals which have been immunised by means of killed cultures or living cultures of plague bacilli "Bacillus pestis".

CLINICAL PATHOGENESIS

- + Sever form of influenza of pulmonary type with hyperthermia, respiratory troubles, soft thick rosy expectorations with presence of sub crepitant rales in the base of the lung
- + Grave toxic infectious state,either cutaneous(bubo) or pulmonary
- + Septcemias accompanied with icterus and hepatic micro abscess
- + Acute gastroenteritis with lesions of ileum
- + Pseudo typho meningitis in milk men,acute toxicosis of babies

SPENGLER

Spengler think that the hematies play an essential part in the phenomena of immunity that the immunising substances are accumulated principally in the stroma of that hematies from animals artificially immunised.

Splenger inoculated tha rabbit with a small quantity of Bacillinum Koch ,the blood may be mixed with that of other rabbits immunised against different other microbes.

He attributes to this immunising bodies a lytic power face to face with Bacillinum Koch and an antitoxic power face to face with tuberculin

CLINICAL PATHOGENESIS

Tubercular condition,begining of tuberculosis

Thermic elevation before menses

Anaemia with great fatigueness.

STAPHAYLOCOCCIN

Is prepared from a culture without addition of antiseptic from a mixture of many stocks of staphylococcin.

GENERALS :

Pre diabetic condition

Syndrome of acute septicemia, oscillating fever with great chill, general condition weakened, splenomegaly

CVS & RESP :

Endocarditis, re appearance of first apical sound or of the second sound at the base, lateral valvular insufficiency

Pericarditis – pericardial rub, myocarditis with dull noises, tensional falls arhythmias.

Disseminated pulmonary condensation, miliary disseminate or multiple abscess with purulent pleural exudations.

EXTR : Osteomyelitis and spondylitis

SKIN : Follicular pustule

Folliculitis of the integument

Purpura, vesiculopustular

STAPHYLOTOXINUM

Is nothing but the anatoxins of staphylococcus obtained by the combination of formol and of the heat on staphylococcus toxin.

It is indicated as a complimentary to staphylococcinum and with the same indication, by its anatoxic specificity.

The presence of alpha haemolysin is a character essential of the stocks, having the pathogenic potential in man.

CLINICAL FEATURES

Contraction, purpura, convulsions and haemophilia

Alimentary intoxication

STREPTOCOCCINUM

Discovered by Pasteur in 1879

Streptococcinum is prepared from the lysate obtained without addition of antiseptic from the culture prepared from a mixture of many stocks of streptococcus supplied by Merieux institute.

POSITIVE DIAGNOSIS

- + Weeping, obsequious, intolerance to noise
- + Depression with migraine, vertigo and myocardiac asthenia
- + Audiovisual hallucinations, muscular asthenia
- + Articular rheumatism especially of the smaller joints
- + Exanthema & erythema of the skin, face & legs in particular

CLINICAL PATHOGENESIS

GENERALAS :

Infectious condition with leucopenia & proteinuria

Streptococcus angina and erysipelas

Acute articular rheumatism

Multiple intolerance – noise, light, least air etc.

Cancerophobia, maniac depressive conditions

Auditory and visual hallucinations

Cenertopathies – sensation of vibration in the vertebral column & the limbs

Tenacious migraine with vomiting of bile

Agitated sleep with dreams

GIT :

Alveolar dental pyorrhoea

Gastric manifestations of allergic origin

Sudden pain of the oesophagus after meals radiating to back

CVS : Post infectious phlebitis & arhythmias

Electric perturbation of the heart- focal blocks,cramping pain in the precordial region

RESP :

Chronic lymphadenitis and c/c tonsilitis

Red angina with or without dysphagia and temperature

Persistent pain and redness of throat

Acute or c/c rhinitis or otitis

URINARY : Acute glomerulonephritis

Degenerative interstitial or epithelial nephritis

SKIN : Allergic erythrodermatoses

Repeated eczema and loss of hair

Chronic edema of lowerlimbs

Cellulitic patches and vesiculopustular eruptions

STREPTOENTEROCOCCINUM

Is a lysate of culture of streptococcus or Enterococcus proteiformis, varieties of gingival origin of streptococcus fecalis.

" This germ which loses 9/10th of its virulence in the intestine, has all its virulence the very moment it passes in the blood or comes in contact with gums, saprophyte of the mouth" – **Pommier De Santi.**

GENERALS :

Allergo-sensory subjects (psorosycotic)

Suffering from different affections, but having some congestive boils on gum, with arthritic manifestations, gonorrhoeal, colibacillary or tubercular.

Congestion of the gums, painful during dentition with loaded tongue

Chronic aphonia < by tobacco & humidity

Ø C/c cryptic or pseudomembranous tonsilitis

Ø A/c angina with marked influenzal condition

Ø C/c sinusitis with purulent rhinitis

Ø Eczema of the newborn

SECALE CORNUTUM

Ergot of rye should always be prepared fresh, as it is fed on by a small cicada which destroy the interior of the grain, leaving it an empty shell

GENERALS

#. A useful remedy for old people with shriveled skin

#. Ergot produce a contraction of the unstriated muscular fibers, have a constricting feeling through out the body

#. Debility, anxiety emaciation though appetite and thirst may be excessive.

#. Secale decrease the flow of pancreatic juice by rising the BP

#. Haemorrhagic diathesis- the slightest wound can bleed for weeks

EYE :

Incipient cataract

Eye sunken and surrounded by blue margin

GIT :

Dry cracked tongue with blood like milk exudes

Tingling of the tip of the tongue, which is stiff

Unnatural ravenous appetite, craves acids

Vomiting of blood and coffee ground fluid

Cholera like stool with coldness and cramps of extremities

URINE : Enuresis in old people

FEMALE :

Dysmenorrhoea with coldness and intolerance of heat

Leucorrhoea, green brown offensive

Continuous oozing of watery fluid until next period

Threatened abortion at the third month, dark offensive lochia

During labor, no expulsive action, with too long after pains and hourglass contraction

Suppression of milk, breast do not properly fill

SLEEP : insomnia of drug or liquor habits

SKIN : Raynaud's disease

Dry gangrene developing slowly

Varicose ulcer, wants parts uncovered, though cold to touch

Great aversion to heat, formication under skin

TETANOTOXINUM

Cachis of Barcelone

Dilution of tetanic toxin

FEATURES

Ø Inveterate bronchial affections

Ø Trismus

Ø Tetanus

Ø Parathyroidian syndrome

THYMI GLANDULAE EXTRACTUM

Thymus gland extract

Arthritic deformans, metabolic osteoarthritis

5 gram tabs tds

TOXOPLASMA – GONDI

Nicolile & Manceaux in 1908 isolated this parasite from a rodent of south of Tunisia, the Gondi.

Is an intracellular parasite having 3 forms - vegetative, cystic and oocystic

The human toxoplasma has an origin essentially alimentary by the ingestion of meat of pork or of infected sheep.

There is also transplacental transmission

The stock is a lysate of T.gondi diluted and dynamised according to Homoeopathic principles.

This remedy is having a polyvalent indication, as of a polychrest but wanting a regular Homoeopathically proved pathogenesis.

Toxoplasmoses disease having the characteristics of an infectious disease and ubiquitous immunologic character because of its multiple local seats, the deep and slow action on the tissues, humoral modification and the genetic repercussions.

The genotype code is a polymorphous, toxic, infectious, traumatic. This poly aetiology leaves in the cell memory some information where results a contradictorial corticovisceral conditioning.

The clinical expression shows some desperate, contradictory nosographic forms. The clinic describe the subject having alternate excitation and cortico visceral inhibition with restlessness, anxiety, depression and hyperactivity.

POSITIVE DIAGNOSIS

+ Cancerous tuberculinic state

+ Isolated persistent adenopathies

+ Tendency to spontaneous abortions

+ Embryopathies, myocarditis & chorioretinitis

+ Gilbert's rosacea

CLINICOP-ATHOGENESIS

GENERALS :

* Tuberculinic or precancerous state

* Predisposition to repeated spontaneous abortions

* Children with retarded development, physical or intellectual

* They have repeated rhino pharyngitis & non suppurative adenopathies

* Generalised toxoplasmosis in subject under immune suppression

Symptoms of mononucleose infection of young children with a sub febrile state, descreat adenopathy, eosinophilia with negative Bunnel-Davidson reaction .Neonatalepticemia with icterus, wilson's disease, hepatosplenomegaly, purpuric rbiliform erythema Repeated convulsions in children- Bravais jakson epilepsy

Normal pregnancy with congenital toxoplasmosis
Epidemic hepatitis

CVS

Endocrino hepatocardiac syndrome of laubry
Exertional dyspnoea, palpitation, orthopnoea and cough
Nocturnal polypnoeic attacks
Hypertrophy of Lt ventricle

THYROIDINUM

A sarcode

Tricuration of fresh thyroid gland of sheep or calf

- + In myxedema and cretinism
- + Undescended testes
- + Increased heart rate, exophthalmos & dilated pupil
- + Produces anaemia muscular weakness, sweating, headache etc.
- + A power diuretic in myxedema & other edmas
- + Mammary and uterine tumors, morning sickness, goiter etc.

HEAD : Persistent headache with flushed face and bad taste in mouth

HEART : Tachycardia, palpitation from least exertion, weak heart with numbness of fingers

EYE : Progressive dimness of sight with central acotoma, exophthalmos

URINARY : Enuresis of weakly children who are nervous and irritable Increased uric acid

EXTR : Rheumatic arthritis with tendency to obesity

Coldness and edema of extremities

SKIN : Psoriasis associated with adiposity (not in developing stage)

Dry impoverished, eczema, ichthyosis , Jaundice with pruritis.

TUBERCULINUM

By Swan in 1806

Pus with bacilli from tubercular abscess

TUBERCULINES..

By Koch _ Old tuberculine(Tuberculinum) - TK

Residual tuberculine -TR

Tub.B E -emission of TK dried & crushed finally in glycerine

Tub AF- phenol K

By Splenger - Tub oxy bovine bacilli

By Kent _ Tub bovinum kent

Tub.pisces _ From fish

There is no Hahnemannian pathogenesis of tuberculinum

POSITIVE DIAGNOSIS

- + Unstable subjects, changes places & change the places of objects
- + Mobility and variability of symptoms, tendency to take colds
- + Anxiety, emaciation, capricious appetite, fear of dogs
- + Periodic headache, sweats, imperious morning diarrhoea standing posture painful
- + Intermitent fever, hands hot, chill, nasal and racuous voice
- + Aversion to meat, desire cold milk, sweets and alcohol
- + Dyspnoea, irritating cough, greenish expectorations
- + Skin dry rough , fissured with subcutaneous indurated nodules

- + Acne and pustules of face
- + Troubles of libido with sometimes a clear augmentation or perversion
- + When the best selected remedy fails

CLINICO PATHOGENESIS

GENERALS :

Mobility and various ability with tendency to take cold
 Nervous, depressed ,bad temper and fear of dogs
 Somnolence during the day, weakness of memory,distate of life < by music
 Alternation of troubles, mental and pulmonary
 Aversion towards some person without reason

HEAD :

Chronic headache of students, intellectuals, periodic every 7 or 14th day
 When the best selected remedy fails
 Sensation as if skull is tightly tied by a band of iron

GIT :

Fetid breath,bad taste,swollen gums,abundant tartar on teeth
 Loss of appetite with sensation of emptiness, hunger at night
 Morning diarrhoea followed by great weakness and sweat
 Involuntary stool while passing wind or during sleep

RESP :

Swelling of cervical glands, indurate or suppurated
 Intermittent nasal voice, painful and temporary aphonia
 Aphonia with a dryness and roughness of larynx
 Asthamatic dyspnoea with pain at the apex of lung
 Lt pleural rub
 Irritating cough in evening,the patient cannot sleep, dry hard irritating cough
 Thick yellow greenish expectorations

SENSE ORGANS

Redness & swelling of the nose, upperlip and cheek
 Abundant burning secretions from the back of the nose
 Repeated coryza and styes,marginal keratitis of eye
 Chronic painless discharge from both ears with or without smell

UROGENITAL

Painful tenesmus while urinating
 Chronic glomerulonephritis
 Prolonged menses for 20 days
 Bilateral ovarian pain
 Late menstruation in young girls

EXTR :

Aggravation on standing
 Constant desire for movement
 Deforming juvenile osteochondritis hip (Perthes calves disease)
 Pain of all limbs and articulations

SKIN :

Pruriginous eczema
 Dry oozing eczema with fissures, painful
 Violent edma above the eyelashes,at the root of hairs
 Easy perspiration which stains yellow
 Nodular erythema subcutaneous or indurated

TUBERCULINUM RESIDUM (TR)

Tuberculinum residum is obtained from the stock solution in glycerine,containing the principles insoluble in water of Koch's bacilli mycobacterium tuberculosis.

POSITIVE DIAGNOSIS

- + Subject pale,weak,grayish and fatigued

- + Digestive heaviness, dry cough
- + Pains of articulations and rigidity of ligaments
- + Dryness of skin with fissures

CLINICOPATHOGENESIS

GENERALS :

Emaciation instead of good appetite
 Splitted upper lip
 Great weakness with desire of sleepiness
 Feels better in open air in stretched position
 Heaviness of skull with need for open air
 Should wink the eyebrows to see distinctly

RESP :

Dry cough with dyspnoea
 Rare expectoration difficult to throughout

EXTR :

Sensation of stiffness and ankylosis of the articulations
 Painful difficult and limited shoulder movement
 Pains of all articulations < when waking up after a long rest.

USTILAGO

Corn-smut

Menopausal congestion in various parts, flabby condition of uterus with haemorrhage.

MIND :

Amativeness, erotic, increased masturbation
 Weeping after emission

HEAD :

Nervous headache from menstrual irregularities
 Vertigo during menopause
 Crustae lactea

MALE :

Uncontrollable masturbation, erotic fancies and amorous dreams
 Emission with irresistible tendency to masturbation

FEMALE :

Protracted painful dysmenorrhoea, vicarious menses
 Profuse menses after miscarriage, discharge from slightest provocation
 Tendency to abortion in flabby women
 Climacteric ailments, easily bleeding cervix
 Indurations and inflammation of mammae, milk absent or disappearing

EXTR :

Muscular debility, sensation of boiling water along the back
 Muscular contraction of lower limbs
 Thick and exfoliating nails

SKIN :

Dry eczema, copper colored itching spots
 Alopecia, pruritis, sun burn and psoriasis (internally & externally)

COMPARISON

SECALECOR

Burning in all parts of the body
 as if sparks of fire falling on
 < by warmth, covering affected part
 < from heat, all diseases

USTILAGO

Burning in esophagus, stomach
 heart etc, less in skin
 Faintness & oppression in a
 warm room
 < from warmth is less marked

Adapted to thin scrawny feeble atonic, Cachetic women, irritable nervous irritable desperate, weak mentally

Adapted to weak relaxed

Hge copious thin black, slightest wound clotted
May bleed for weeks, defibrined
ong black strings, partially dark

Pale sunken
Hge. passive oozing dark

Partially clotted and stringy or Thin watery.

V A B (Ex. BCG)

Stock obtained from Vaccine BCG
Vaccinum BCG
Vaccine Bile Calmette Guanine

A polychrest useful in all paratubercular & somatopsychic state It replaces the nosode Marmoreck
Complaints are very similar to Eupatorium, influenzinum & yersin serum

POSITIVE DIAGNOSIS

- + Asthamatic subjects, lean hypersensible & constipated
- + Chilly cannot tolerate noises, headache with restless sleep
- + Anorexia, persistent nauseating taste
- + Adenopathies with fatiguing pleurodynia & dry cough
- + Frequent nasal block, red eye otalgia

CLINICAL FEATURES

GENERALS :

Tuberculinic state of lean subjects, always fatigued
Chilly suffering from constipation
Intellectual excitability with tendency to exaggerate his cares
Every noise irritates, easily enervated, angry & depressed
School boys headache, towards the end of afternoon and in the evening
Prolonged insomnia in the second part of night

GIT :

Anorexia with a state of nausea or unceasing hunger
Slow digestion, gastric bloating with tendency to vomit

RESP :

Chronic tonsillitis, hypertrophy of tonsils with vegetations
Infantile asthma, relapsing pleuritis
Chronic cervical adenitis, pleurodynia

EXTR :

Scheurman's disease_ painful dorsal kyphosis of children
Poly articular pains, Lt. Temperomaxillary pain < by mastication

SKIN :

Ichthyosis appearance of the skin
Painfull sensitiveness of hair on combing
Cracks and fissure on mucocutaneous junction

VACCINUM OR VACCINOTOXINUM

Vaccin antivariolae/ vaccin vaccinae/jennerian vaccin

This preparation of antivariolic vaccine – the shreds collected by scraping of an eruption on the skin dveloped in an hoover 5 days after inoculation of the vaccine virus

Vaccinum alone or associated with vit B12 seems to have good action in zona

POSITIVE DIAGNOSIS

- + Weeping anxious subject
- + Capricious children
- + Fronto orbital neuralgic pain
- + Nose with greenish yellow mucus,Rt.parotid swollen
- + Oliguria haematuria and edema

CLINICAL FEATURES

GENERALS :

Prevention of small pox,de sensibilisation of antivariolic vaccination

Sickly humor with restless sleep

Asthenia with the need of stretching and yawning

Child wants to be carried

Frontal headache as if going to burst,wake up night due to pain

Sensation of ice water along the back,as if bones are broken

GIT :

Thick tongue with prominent papillae with yellow coating

Loss of appetite, cannot tolerate the smell or sight of food

Abdominal bloatedness with pain

SENSE ORGANS :

Sensation as if the nose is full of discharges

Swelling of Rt.parotid region

Bleeding nose with a pinching highup sensation in throat

Orbitary pain of the ocular globes as if they are going to burst

Eye and face red with little eruptions on the face and hands

UROGENITAL :

Nephritis with haematuria,albuminuria and edema

Abundant and very frequent mictiuriation

EXTR :

Pain of the lt. Arm difficult to rise in the morning

Sensation of numbness and burning of the 4th finger of lt.hand

Rigidness, restlessness and trembling of lt.arm

Painfull sensation of the legs as if after a fatigue

Legs heavy painful and difficult to rise

SKIN :

Small eruptions and re pustules in any part of the body

Come up during heat,especially on lt. Shoulder,behind rt. Ear

Pustules like small pox.pea size with a central depression and an Indurated base,purpuriginous

Keloids on the cicatrices of the varices

VARIOLINUM

Lysate obtained from the serosity of small pox pustule
Vaccinotoxinum may be used in its place

POSITIVE DIAGNOSIS :

- + Anxious subject with purple red face, eyelids swollen, impression of becoming deaf
- + Violent occipital headache
- + Excruciating backache
- + Dorso renal pain
- + Maculo pustular vesicular eruptions
- + High fever with abundant nauseating sweat

CLINICAL FEATURES

GENERALS :

Distant squeal of antivariolic vaccine
As a preventive to small pox
Morbid fear of contracting small pox
Impression of being deaf
Violent intolerable occipital headache
Post herpetic neuralgia, impression of ball in throat

GIT :

Fetid breath with a dirty yellow coated tongue
Any smell cause nausea, painful deglutition

UROGENITAL :

Bilateral renal pain always accompanied by a dorsal pain
Meterrohagia with lumbar pain

EXTR :

Intense pain in lumbosacral region
Gripping pain in back, radiating towards belly

SKIN :

Varioliform eruptions of red round maculae which transform in to papule,
Then become papulo vesicular.
Tubercular lupus.

X - RAY

Vial containing alcohol exposed to x-ray

POSITIVE DIAGNOSIS

- + History of repeated exposure to x- ray, resulting skin lesion followed by cancer
- + Sterility with atrophy of ovaries & testicles
- + Anorexia, leukemia and other blood born diseases
- + Stimulate the cellular metabolism, arouse the vitality mentally and physically
- + Arouse the suppressed symptoms, especially sycotic and those due to mixed infection

MIND :

Mental irritability ,aversion to company and desire to kill

HEAD :

Stitching pain in different parts of head and face
Stiff neck, sudden crack in back, pain more severe behind ears
Fullness with ringing in ears

FEMALE :

Lewed dream, desire lost

Re establishes suppressed gonorrhoea

EXTR : Rough scaly palms

SKIN :

Dry itching eczema, painful cracks

Psoriasis, warty growth with wrinkled skin.
